# J55/J55i HEADPHONES

High-performance on-ear headphones with JBL® Pure Bass and DJ-pivot ear-cups

LEGENDARY SOUND SINCE 1946

**FOR PURE  
BASS,  
NOTHING  
BEATS JBL.®**

For more than 60 years, JBL® engineers have designed the precise, naturally articulated sound found in cinemas, arenas and recording studios around the world. That legendary JBL sound is now available anywhere personal audio travels – with a look all its own.

The JBL J55 headphones literally put you in the center of professional-grade audio. Drawing on years of expertise building some of the finest loudspeakers in the world, JBL engineers created lightweight, on-ear headphones with a fresh look and uncompromising JBL sound. The JBL J55 high-performance drivers generate clarity and extended bass that competitive products simply can't touch. A unique, DJ-pivot mechanism lets you rotate either ear cup up to 180 degrees, which frees up one ear to hear outside sound. Bold styling, including brushed, stainless-steel ear cup and headband accents, makes the JBL J55 headphones an aesthetic, as well as acoustic, triumph. Plus, the padded headband and ear cushions make these headphones comfortable for everyone except our competitors.

## HIGHLIGHTS:

- Premium, high-performance drivers
- Closed-back design
- Rotating, 180-degree, DJ-pivot mechanism
- Single-side, detachable cable
- Cable-locking mechanism
- Rugged strain relief
- Apple three-button remote with built-in microphone (J55i model)
- Bold design and premium finishing
- Padded carrying pouch

Finishes:   

# KEY FEATURES

## J55/J55i HEADPHONES

Hear the truth™

JBL knows what it takes to bring accurate, powerful sound to a venue, whether that venue is a concert hall or the human ear.

### Premium, high-performance drivers

The JBL J55 headphones employ 1-5/8-inch (40mm) drivers that produce outstanding frequency response (16Hz – 20kHz), superior clarity and bass that is pure, deep and accurate. As a result, the JBL J55 headphones outperform competitive products costing much more.

### Closed-back design

The JBL J55 on-ear headphones feature a closed-back design that blocks ambient noise and minimizes leaking. So outside noise stays outside, and your listening experience stays yours and yours alone.

### Rotating, 180-degree DJ-pivot mechanism

Sometimes you need to be aware of more than just your music. The JBL J55 earphone ear cups can rotate up to 180 degrees while you're wearing them so you can keep one ear on your audio and one ear on external sounds or conversations. The ear cups can rotate under the headband for storage and transport.

### Single-side, detachable cable

The JBL J55 headphones use a tangle-resistant, flat-elastomer cable that connects to just one ear cup, which further minimizes tangling. The cable detaches from the ear cup for added flexibility.

### Cable-locking mechanism

To keep the detachable cable secure when it's connected, the JBL J55 headphones employ a unique, twist-lock mechanism. When you plug the cable into the ear cup, a simple twist locks it in place.

### Rugged strain relief

A strong, secure connection between the housing and cable is critical for both durability and sound quality. The JBL J55 headphones feature a rugged strain-relief connector that dampens vibration for enhanced acoustic performance.

### Apple three-button remote with built-in microphone (J55i model)

Made specifically to use with the iPhone and iPod, the in-line remote offers familiar audio-playback controls, and a built-in microphone lets you answer calls with remarkable clarity while leaving the headphones on.

### Bold design and premium finishing

From the sandblasted stainless-steel headband and ear-cup accents to the matte-black or -white housings, and from the embossed JBL logo to the cable that matches the ear pads, the JBL J55 headphones are designed to be as pleasing to the eyes as they are to the ears.

### Padded carrying pouch

JBL sound is always worth protecting. The JBL J55 headphones come with a padded carrying pouch that keeps them safe from bumps and bruises when you're not wearing them.

# SPECIFICATIONS

## J55/J55i HEADPHONES

Hear the truth™

Acoustic performance that outclasses the competition.
